8Bitdo

FAST STARTUP

Power OFF: Hold down for 3 seconds.

	Mode 1	Mode 2	Mode 3	Mode 4	Mode 5
	Joystick	Bluetooth Keyboard	iCade	Emu-Touch Screen	USB Joystick
Power ON (Hold down key for 3 seconds)		+ B	+ A	+ X	Power on first, then connect USB cable
Blue LED					Can be ignored
Support system					
Memo	PC can use Bluetooth Adapter.	Power+B+R power on. The 2nd Keyboard code.	Input method should be English.	Need ROOT Need Jailbreak	Also charge GamePad battery

The most common situations:

- 1.For Android devices, use Mode 1.
- 2.For iOS devices, use Mode 2 or 3.
- 3.For games that only support touchscreen controls, use Mode 4.

To turn Power OFF: Hold down button for 3 seconds.(Until the purple LED light on)

To activate the conditions below, you will need to clear the pair information on the FC30 Pro.

Press the button for more than 3 seconds to clear pair information. When both LED lights blink once you are able to connect other devices to the FC30 Pro again.

- 1.Connect the FC30 Pro to another device.
- 2.Change between Mode 1, 2 or 3.
- 3.Request password (to pair), if not "0000".

Note: Make sure the battery of the FC30 Pro is not empty. Otherwise use the USB-cable to charge the device.

For two players: IOS/Mac OSX/Android/PC

Player 1 press + B to power on the FC30 Pro. (LED light will blink twice.)

Player 2 press + B + R to power on the FC30 Pro. (LED light will blink once, for a longer period of time.)

Both FC30 Pro will provide a different key code password to work with Bluetooth. The mapping of the keys can be done in game.

Multiplayer mode(s):

Android/Windows: Connect the FC30 Pro with the USB-cable or Bluetooth. Multiplayer support depends on the game itself.

Mode 1, 2 and 3

Manual in Detail:

(Note: Make sure the battery of the FC30 Pro is not empty. Otherwise use the USB-cable to charge the device.)

Establishing Bluetooth connection with Mode 1, 2 or 3 activated:

Following instructions on page Fast Startup Figure, to turn on the FC30 Pro in mode 1, 2 or 3.

- 1.Scan for Bluetooth devices on your Android/iOS device.
- 2.Select "8Bitdo FC30 Pro" in the list of available devices.
- 3.Map the keys in the app or emulator you will be playing.

Mode4

Emu-Touchscreen mode

Note: Android needs ROOT

- 1.Download the official 8Bitdo APP/APK from the official site at www.8Bitdo.com.
- 2.Follow the instructions on page Fast Startup Figure, to turn on the FC30 Pro in mode 4.
- 3.Run the 8Bitdo app and scan for Bluetooth devices. When detected tap "8Bitdo FC30 Pro" to pair.
- 4.If asked for pairing code (password), enter "0000".
- 5.In Emu-Touch screen mode, press SELECT+START to activate 8Bitdo app.
- 6.Finally, drag and drop buttons in order to map the keys to your satisfaction. Press SELECT+START to finish set-up.

Warning :

Android: After using Mode 4 and you wish to use Mode 1, 2 or 3, you will need to clear pairing information at system Bluetooth first and then scan, pair again.

Tip: Double tap DPad or use two fingers can zoom it to fit games.

Mode5

Windows USB Cable Mode

- 1.Use the enclosed USB-cable to connect the FC30 Pro to your PC. Your PC will immediately recognize the device.
- 2.You will be able to map the keys, in the game options of the game you are playing.

Note: When connecting the FC30 Pro to your PC the battery will also charge.
