Modes:

- 1.For Android devices, use Mode 1.
- 2.For iOS devices, use Mode 2 or 3.
- 3.For games that only support touchscreen controls, use Mode

To turn off the controller: Hold down START button for 3 seconds.

To connect the joystick SNES30 Pro to another device:

Delete pairing information of SNES30. Holding the SELECT button down for more than 3 seconds. When both LED lights have flashed once, NES30 Pro can be connected to other devices.

- 1.Connect the SNES30 to another device.
- 2.Change between Mode 1, 2 or 3.
- 3.Request password (to pair), if not "0000".

Note: Make sure the battery of the SNES30 is not empty. Otherwise use the USB-cable to charge the device.

For two players: IOS/Mac OSX/Android/PC

Player 1 press START + B to power on the SNES30 GamePad. (LED light will blink twice.)
Player 2 press START + B + R to power on the SNES30 GamePad. (LED light will blink once, for a longer period of time.)
Both SNES30 GamePads will provide a different key code password to work with Bluetooth. The mapping of the keys can be done in game.

Multiplayer mode(s):

Android/Windows: Connect the SNES30 GamePad with the USB-cable or Bluetooth. Multiplayer support depends on the game itself.

Mode 1, 2 and 3

Manual in Detail:

(Note: Make sure the battery of the SNES30 GamePad is not empty. Otherwise use the USB-cable to charge the device.)

Establishing Bluetooth connection with Mode 1, 2 or 3 activated:

Follow instructions on page Fast Startup Figure, to turn on the SNES30 GamePad in mode 1, 2 or 3.

- 1.Scan for Bluetooth devices on your Android/iOS device.
- 2.Select "8Bitdo SNES30 GamePad" in the list of available devices.
- 3.Map the keys in the app or emulator you will be playing.
